

Insight Initiative

New Insights on the website

New insights are hosted within the [Voices of Insight](#) section on Insight Exchange.

Read the insights of [Brianna](#) through her experiences of two abusive partners.

Exchange Initiative

New resource – Foundations Guide

Are you new to, or wanting to refresh your understanding of, the core tenets of response-based practice? Take a tour of the [Foundations Guide](#) which outlines the core tenets of response-based practice with a deeper dive into the related ideas on Insight Exchange.

New resource – Practice Exchange (PX) portfolio

[Practice Exchange](#) is designed to be a supportive initiative for organisations to reflect on and develop their practice in responding to Domestic and Family Violence and related forms of adversity.

Practice Exchange (PX) explores these responses at a granular real-world, real-work level – on the level of practice. PX provides a supported opportunity to review real-world scenarios, interview transcripts, case management notes, practice guidelines and policy frameworks from the perspective of response-based practice.

Read the [Practice Exchange 2019 Portfolio](#). The 2019 Practice Exchange Teams are based in NSW Australia and self-selected to participate in the initiative. The services/organisations include:

- Liberty Domestic and Family Violence Service
- Rosie's Place
- South East Sydney Local Health District
- Women's Health NSW
- Penrith Women's Health Centre

Read the PX Portfolio to learn more from each team about their insights, efforts and developments in their practice. The PX Portfolio includes practice scenarios from each team to show the ideas of response-based practice applied.

New resource – Language Lab Sample

Read the new sample of work – An [analysis of an account](#) developed by one of the participants in the Practice Exchange initiative. The author has developed three deidentified versions of an account of domestic violence and has drawn on the existing materials in the [Language Lab](#) to inform the analysis.
