

## FUTURES FRAMEWORK

[www.insightexchange.net/futures-framework](http://www.insightexchange.net/futures-framework)

The [Futures Framework](#) is designed to support institutions, organisations, services, businesses and community groups in developing a strategic and holistic response to domestic, family and sexualised violence.

The *Futures Framework* can be used to scope, guide and plan short and long term commitments to build on safety, uphold dignity and experiences of justice.

The *Futures Framework* has been updated and is now set out in parts - not as a single document. The four parts are listed below.

**OUR FUTURES**

**OUR RESPONSES**

**OUR ACTIONS**

**OUR ECOSYSTEM**

We invite you to explore the content starting at any part and exploring in any sequence.

## OUR ACTIONS

Many victim-survivors are silent about or silenced by violence and abuse, yet they are right alongside us in our daily living. Their suffering may be unnoticed, yet they are noticing. Noticing us. In their strategic silence, they are attuned to what and who will build on or undermine their safety and dignity... and what this means next. People perpetrating violence also notice our actions and inactions.

In so many ways, victim-survivors have shared what needs to be different. When we listen to victim-survivor's reasons to fear, to what they are having to do and not do, what they are having to give up and go without for safety and dignity, our actions can be more informed.

We invite you to explore how our actions can make a difference....

View, share, embed '[Our Actions](#)' (7mins).
